

Disclaimer

IMPORTANT: please read the following before continuing

The following applies to this document, the oral presentation of the information in this document by Fastned B.V. (the Company) or any person on behalf of the Company, and any question-and-answer session that follows the oral presentation (collectively, the Information). The Information has been prepared by the Company for background purposes only and does not purport to be full or complete. No reliance may be placed for any purpose on the Information or its accuracy, fairness or completeness. The Information and opinions contained therein are provided as at the date of the presentation and are subject to change without notice.

The Information contains references to certain non-IFRS financial measures and operating measures. These supplemental measures, as defined by the Company, should not be viewed in isolation or as alternatives to measures of the financial condition, results of operations or cash flows of the Company as presented in accordance with IFRS in its consolidated financial statements. The non-IFRS financial and operating measures used may differ from, and not be comparable to, similarly titled measures used by other companies. Even though the non-IFRS financial measures are used by management to assess the Company's financial position, financial results and liquidity, and these types of measures are commonly used by investors, they have important limitations as analytical tools, and you should not consider them in isolation or as substitutes for the analysis of the Company's financial position or results of operations as reported under IFRS. Financial objectives are internal objectives of the Company to measure its operational performance and should not be read as indicating that the Company is targeting such metrics for any particular fiscal year. The Company's ability to achieve these financial objectives is inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond the Company's control, and upon assumptions with respect to future business decisions that are subject to change. As a result, the Company's actual results may vary from these financial objectives and those variations may be material.

The Information may include forward-looking statements, which are based on current expectations and projections about future events. These statements may include, without limitation, any statements preceded by, followed by or including words such as "target", "believe", "expect", "aim", "intend", "may", "anticipate", "estimate", "plan", "project", "will", "can have", "likely", "should", "would", "could" and other words and terms of similar meaning or the negative thereof. All statements other than statements of historical facts included in this presentation, including, without limitation, those regarding the Company's financial position, business strategy, plans and objectives of management for future operations (including development plans and objectives relating to the Company's projects and services) may be forward-looking statements.

These forward-looking statements are subject to risks, uncertainties and assumptions about the Company and its subsidiaries and investments, including, among other things, the development of its business, trends in its operating industry, and future capital expenditures. In light of these risks, uncertainties and assumptions, the events in the forward-looking statements may not occur. No representation or warranty is made that any forward-looking statement will come to pass. No one undertakes to publicly update or revise any such forward-looking statement. The Information and the opinions contained therein are provided as at the date of the presentation and are subject to change without notice.

The Information does not purport to be comprehensive. To the fullest extent permitted by law, the Company, nor any of its subsidiary undertakings or affiliates, directors, officers, employees, advisers or agents accepts any responsibility or liability whatsoever for (whether in contract, tort or otherwise) or makes any representation, warranty or undertaking, express or implied, as to the truthfulness, fairness, accuracy or completeness of the Information.

To the extent available, the industry, market and competitive position data contained in the Information come from official or third party sources. Third party industry publications, studies and surveys generally state that the data contained therein have been obtained from sources believed to be reliable, but that there is no guarantee of the accuracy or completeness of such data. While the Company reasonably believes that each of these publications, studies and surveys has been prepared by a reputable party, neither the Company, nor any of its the respective subsidiary undertakings or affiliates, or their respective directors, officers, employees, advisers or agents have independently verified the data contained therein. In addition, certain of the industry, market and competitive position data contained in the Information come from the Company's own internal research and estimates based on the knowledge and experience of the Company's management in the markets in which the Company operates. While the Company reasonably believes that such research and estimates are reasonable and reliable, they, and their underlying methodology and assumptions, have not been verified by any independent source for accuracy or completeness and are subject to change. Accordingly, undue reliance should not be placed on any of the industry, market or competitive position data contained in the Information.

The Information has been prepared by the Company solely for information purposes only. This document does not constitute an offer of securities to the public in the Netherlands or in any other jurisdiction. Persons into whose possession this document comes should observe all relevant restrictions.

Investment Highlights

European leader in public DC fast charging with proven location strategy, targeting only high traffic locations

Best positioned to both capture and enable the tailwind of BEV adoption by improving access to charging infrastructure

Best-in-class and most recognisable charging concept in the market, with key functions optimised in house

Market-leading station economics and business model supported by high traffic levels and capex efficiency

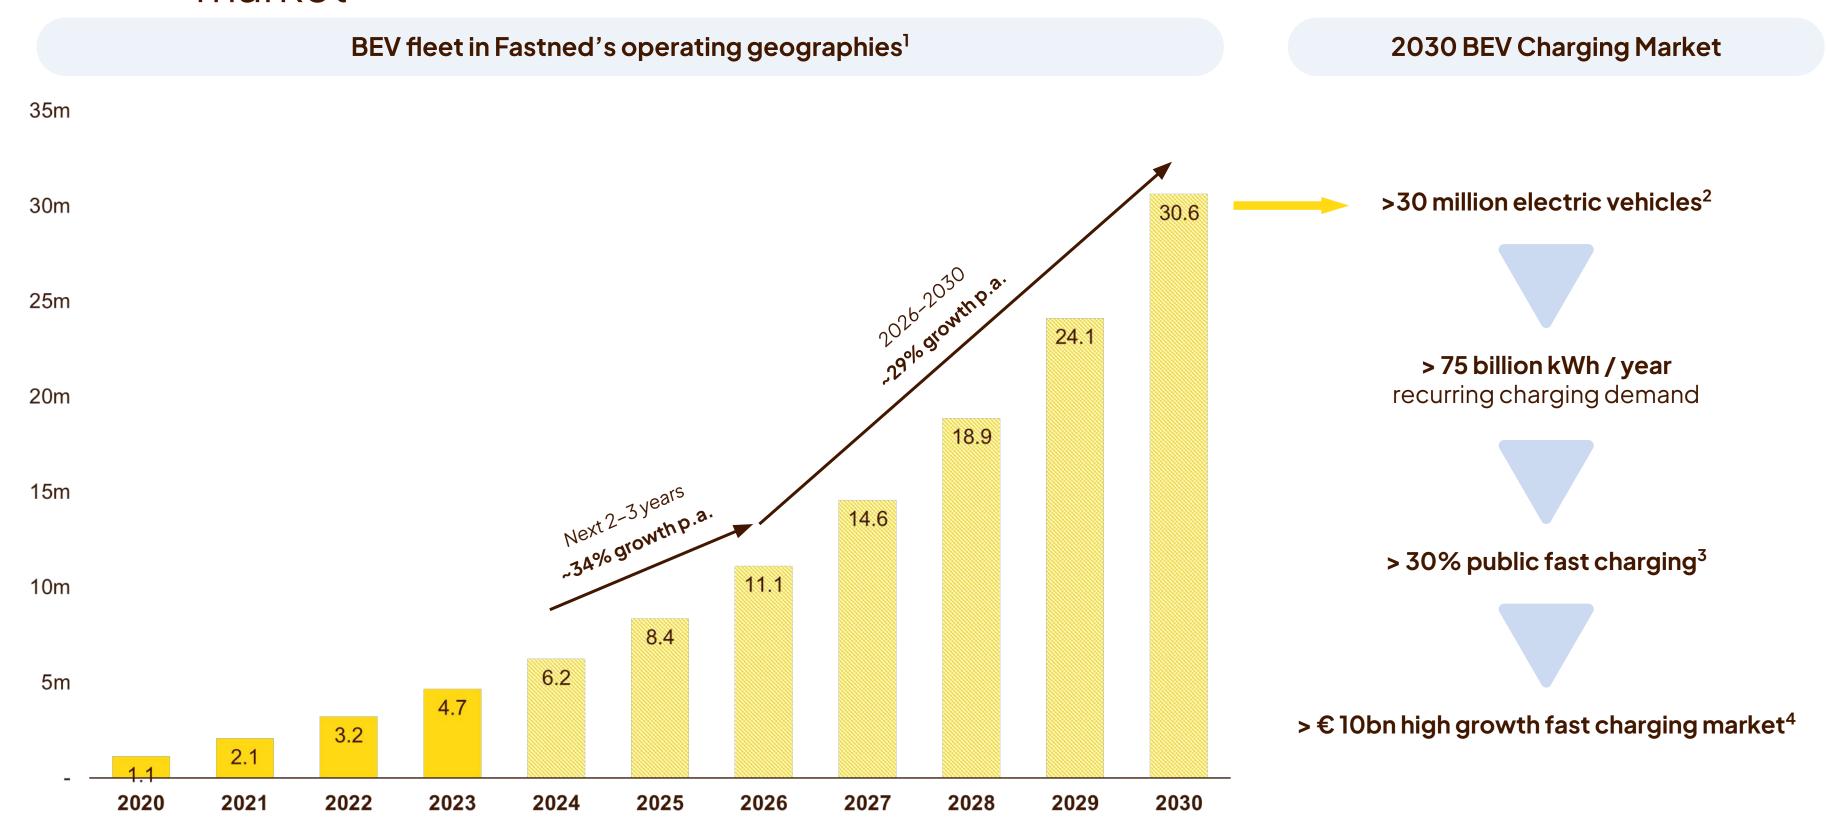

Mission-driven company with ESG at the core of everything we do

The BEV fleet is scaling: creating a large, high growth fast charging market

Fastned ranks among the top three fast charging companies in Western Europe¹

Type

Main location strategy

TESLA	Car manufacturer	Off highway (navigational pull)

- Top line growth is directly linked to BEV adoption large revenue tailwinds
- 2 Best-in-class charging concept captures more traffic resulting in higher number of sessions vs peers
- Outsized session numbers lead to a superior business case which allows price flexibility
- 4 Fully wrapped construction capability delivers high quality and capex efficient infrastructure

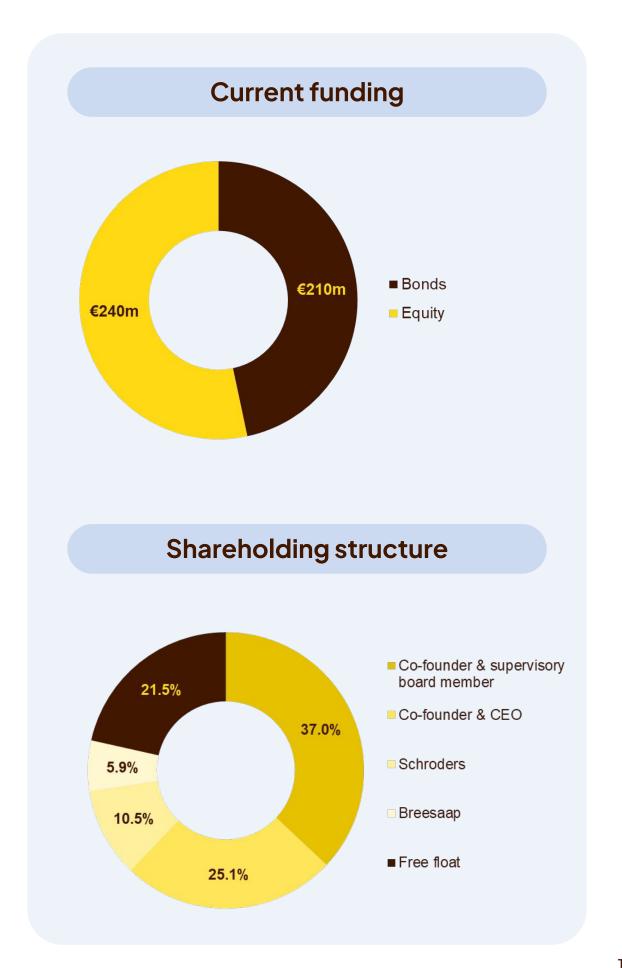

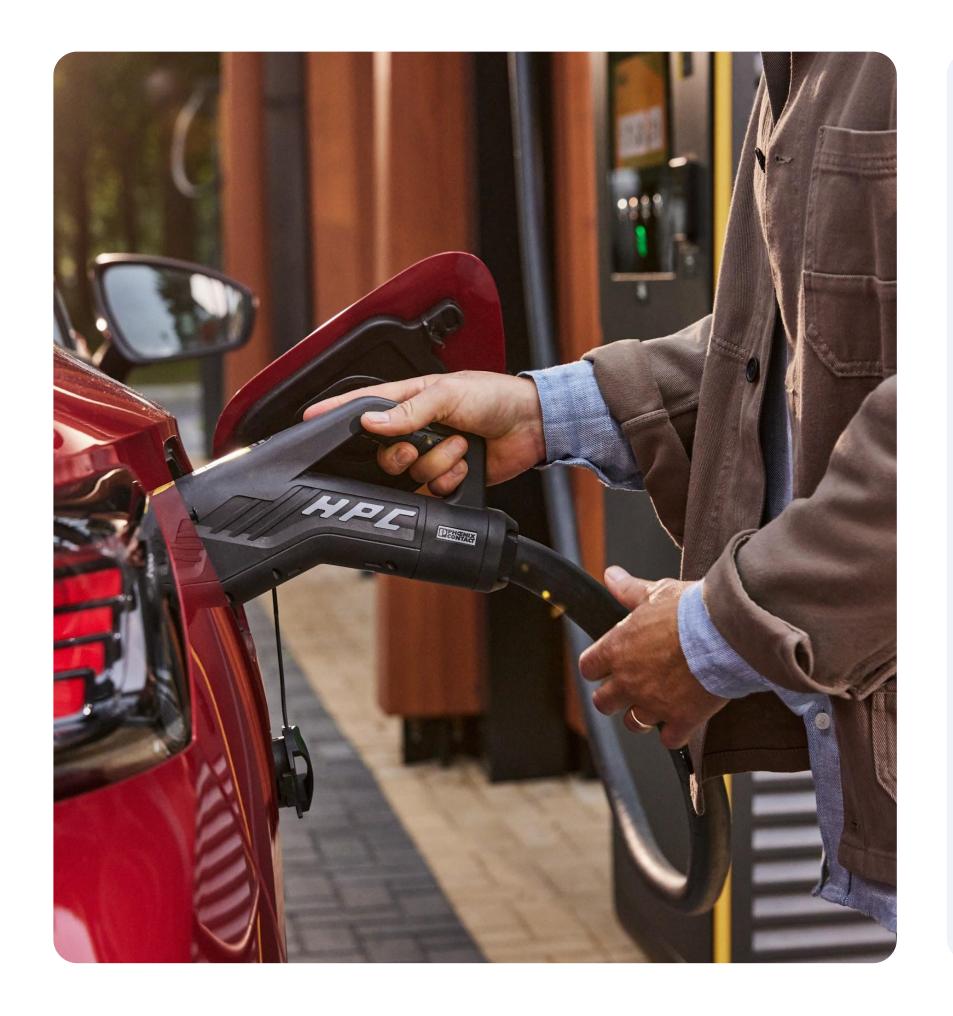

Funded until at least end of 2025 with a strong cash position and retail bond program

Fastned is in complete control of its capex program and therefore can control its future funding need

Funding to date:

- ~€ 240 million in equity funding, through a combination of private placements, an accelerated bookbuild and founders investments In Q4 2022, Schroders' infrastructure fund invested €75m in equity, became a board member, and long-term partner in our target of 1,000 stations by 2030
- >€ 210 million in retail bond funding
- Current cash level of €146m (June 2024) and a further retail bond allows us to build out to more than 420–450 operational stations, expected by end 2025

Guidance & outlook

Network

- 335 to 350 stations operational by year end 2024
- 420 to 450 stations operational by year end 2025
- Target of 1,000 stations before 2030

Financial¹

- Revenue / station > €400k in 2025 and > €1m in 2030
- Operational EBITDA margin > 40% by 2025
- Underlying company EBITDA positive in 2024

Source: 1-Based on current forecasts. Underlying company EBITDA excludes exceptional items such as employee options.

Fastned

Our mission

To accelerate the transition to electric mobility

Our goal

1,000 charging stations by 2030

Our climate impact

With every kWh sold we displace fossil fuels burning into the atmosphere

100% local sun, wind & hydro energy¹ **2023** CO2 avoided

96,148 tonnes

B Corporation

1) For every kWh sold through the grid we buy local (same or adjacent country) solar & wind guarantees of origin

Highly motivated, mission driven team – led by an experienced Executive Team

More than 300 people driving Fastned's mission across 8 countries

Fastned revenue potential

BEV stock growth x Fast charging growth x Right location growth

- Fast charging demand accelerating-6-20× more BEVs-2-4× more fast charging
- High traffic locations are paramount to capture this market
- Fastned # locations to grow 4x
- Revenue potential growing accordingly

Strong organic and inorganic revenue growth

H1, € million	YoY %	2024	2023	2022
1 Revenues related to charging	45%	37.8	26.1	12.6
2 Gross profit related to charging	52%	29.8	19.6	7.8
Gross profit per kWh (€)		0.47	0.47	0.38
Network operation costs	67%	(15.0)	(9.0)	(4.8)
Network operation costs per charger (€k)		8.3	6.6	5.7
3 Operational EBITDA	39%	14.7	10.6	3.0
Operational EBITDA margin		39.0%	40.6%	23.8%
Network expansion costs		(10.9)	(7.8)	(5.6)
4 Underlying company EBITDA	40%	3.2	2.8	(2.7)
Exceptionalitems		0.1	(3.3)	(0.4)
EBITDA		3.3	(0.5)	(3.0)
D&A and provisions		(9.8)	(6.9)	(4.7)
Finance income / (cost)		(4.9)	(2.2)	(3.7)
Underlying net profit		(11.6)	(6.3)	(11.0)
4 Net profit		(11.4)	(10.3)	(11.4)

Strong organic and inorganic revenue growth

Fastned has two big revenue growth drivers:

- Organic volume growth, at +29% YoY in H1 2024, at the 244 stations operational at 1 January 2023.
 - This is driven by the (secular) expansion of the BEV fleet (+31% YoY fleet penetration growth in H1 2024) and Fastned being able to capture charging demand growth at existing stations at high traffic locations
- Inorganic growth through new station openings, at +21% YoY in H1 2024, with 76 stations opened since 1 January 2023 (+31%).

This is driven by Fastned's ability to secure new high traffic locations, deploy its award winning charging concept on them and quickly ramp up sales

- Gross profit per kWh stabilised post energy crisis
- Significant expansion of Operational EBITDA

 5-folding over the last two years, due to a high operational leverage, with significant upside. Close to our target of 40% Operational EBITDA margin
- Net profit negative, due to high expansion effort

 Negative net profit level now almost fully attributable to network expansion costs. These costs are expensed now, but will yield over the 15+ years of station lifes

Operating cash flow near neutral and strong funding position

H1, € million	YoY %	2024	2023	2022
Revenues related to charging	45%	37.8	26.1	12.6
Gross profit related to charging	52%	29.8	19.6	7.8
Gross profit per kWh (€)		0.47	0.47	0.38
Network operation costs	67%	(15.0)	(9.0)	(4.8)
Network operation costs per charger (€k)		8.3	6.6	5.7
Operational EBITDA	39%	14.7	10.6	3.0
Network expansion costs	40%	(10.9)	(7.8)	(5.6)
Underlying company EBITDA		3.2	2.8	(2.7)
Exceptionalitems		0.1	(3.3)	(0.4)
EBITDA		3.3	(0.5)	(3.0)
Capex		21.9	38.0	23.4
Operating cashflow		(1.0)	(2.5)	(8.3)
Cash level		145.8	132.6	116.6

Funding to date:

- ~ € 250 million in equity funding realised
- ~ € 195 million in retail bond funding, 6% coupons, no financial covenants
- ~ € 146 million in cash on balance sheet

We expect to issue one more retail bond tranche in 2024, funding the 2024/25 rollout

6 Operating cash flow near positive

Operating cash flow strongly improved over the last years and is near positive. Note this is including network expansion cash costs of € 12.4 million.

This puts Fastned in an autonomous position:

- Strong organic growth at our existing stations, underpinned by secular BEV fleet growth, will continue to increase operating cash flow generation
- High cash position at € 146 million
- Attractive and successful retail bond programme

Combined, we expect this to fund at least a considerable part of further expansion beyond 2025

High traffic locations capture fast charging volume

Learnings from one of the most mature BEV charging markets worldwide

Fastned operates nearly 20% of the fast charging locations in the Netherlands

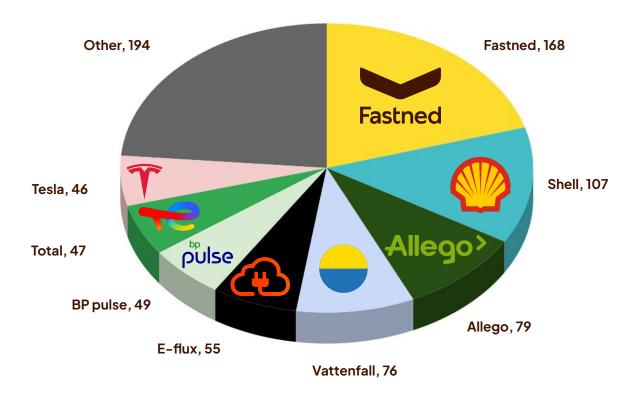

But responsible for nearly 60% of fast charging volume²

Meaning Fastned locations do ~5× more sales than other locations

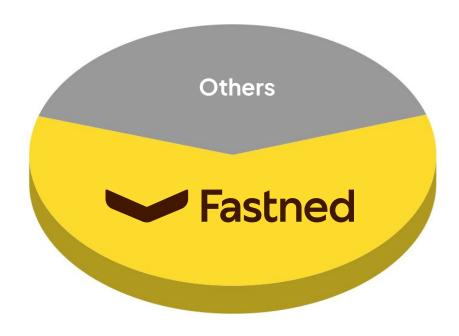

This is driven by high traffic, as well as an excellent customer experience

>90% of Fastned stations on motorways, highest traffic roads in the Netherlands

NL fast charging locations¹

NL fast charging share²

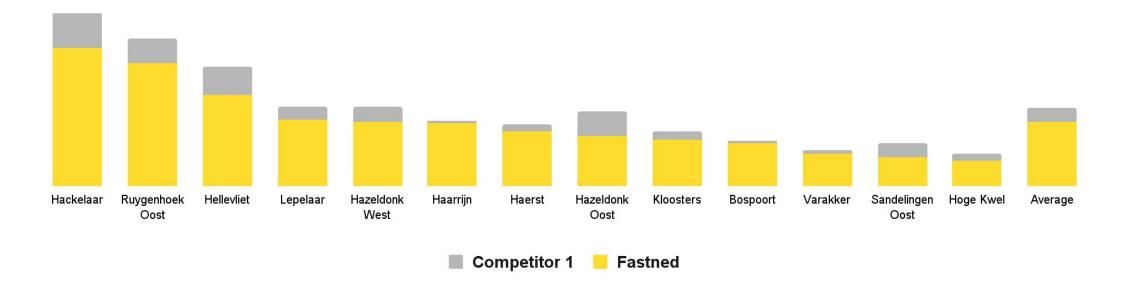

Outperforming competitors at co-locations¹

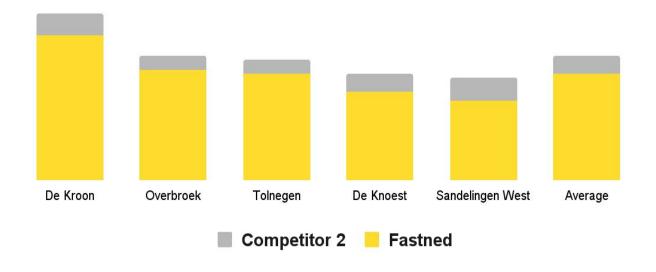

Measured as sessions per day during 2023 at co-locations in the Netherlands

Co-locations are defined as locations where a competitor has fast charging available in the same area as a Fastned station (legacy of current tender regime)

Between Fastned and Competitor 1, Fastned does 82% of the sessions at co-locations

Between Fastned and Competitor 2, Fastned does 85% of the sessions at co-locations

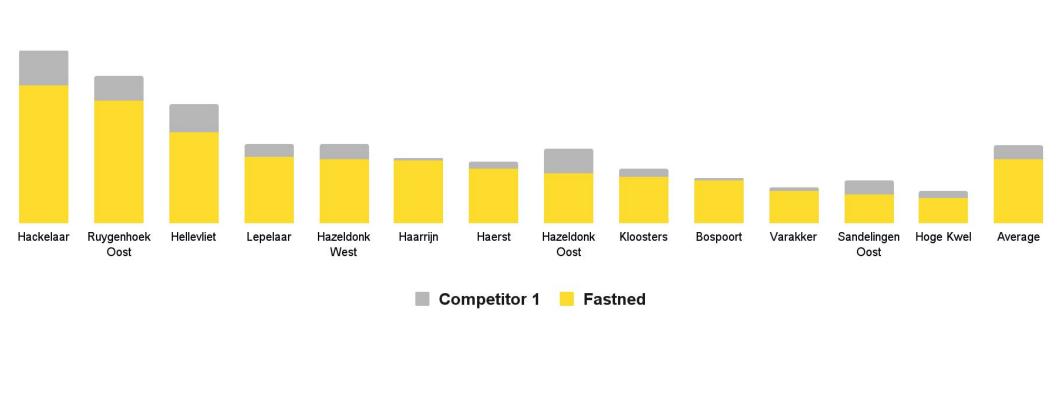

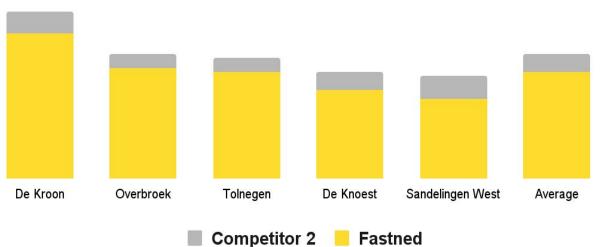

1)<u>ACEA – Jul-Aug data</u>

Outperforming competitors at co-locations¹

Case Study: 3× charging volumes at co-located Hackelaar stations with equal number of charging points

Total number of sessions in 2023

1) Charging Radar. 2) <u>Shell Recharge Linkedin</u>

Charging at motor service areas has as superior business case vs. location charging

Stations on MSAs benefit from a naturally higher demand due to positioning on high traffic roads – resulting in $\sim 3-4\times$ more sessions per day

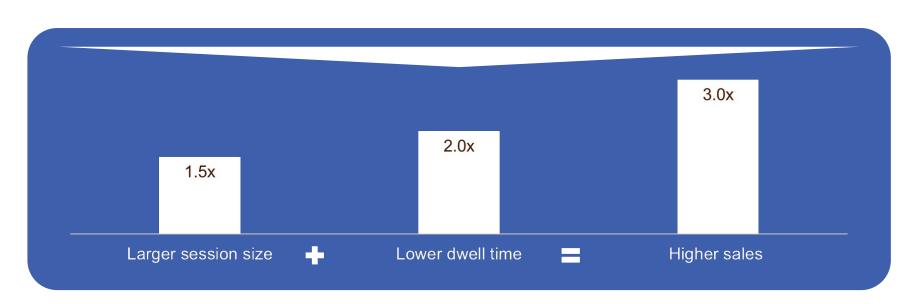

Because people will charge at MSAs when their battery is low, rather than their fridge being empty, State of Charge (SoC) is expected to be lower, increasing maximum potential session sizes

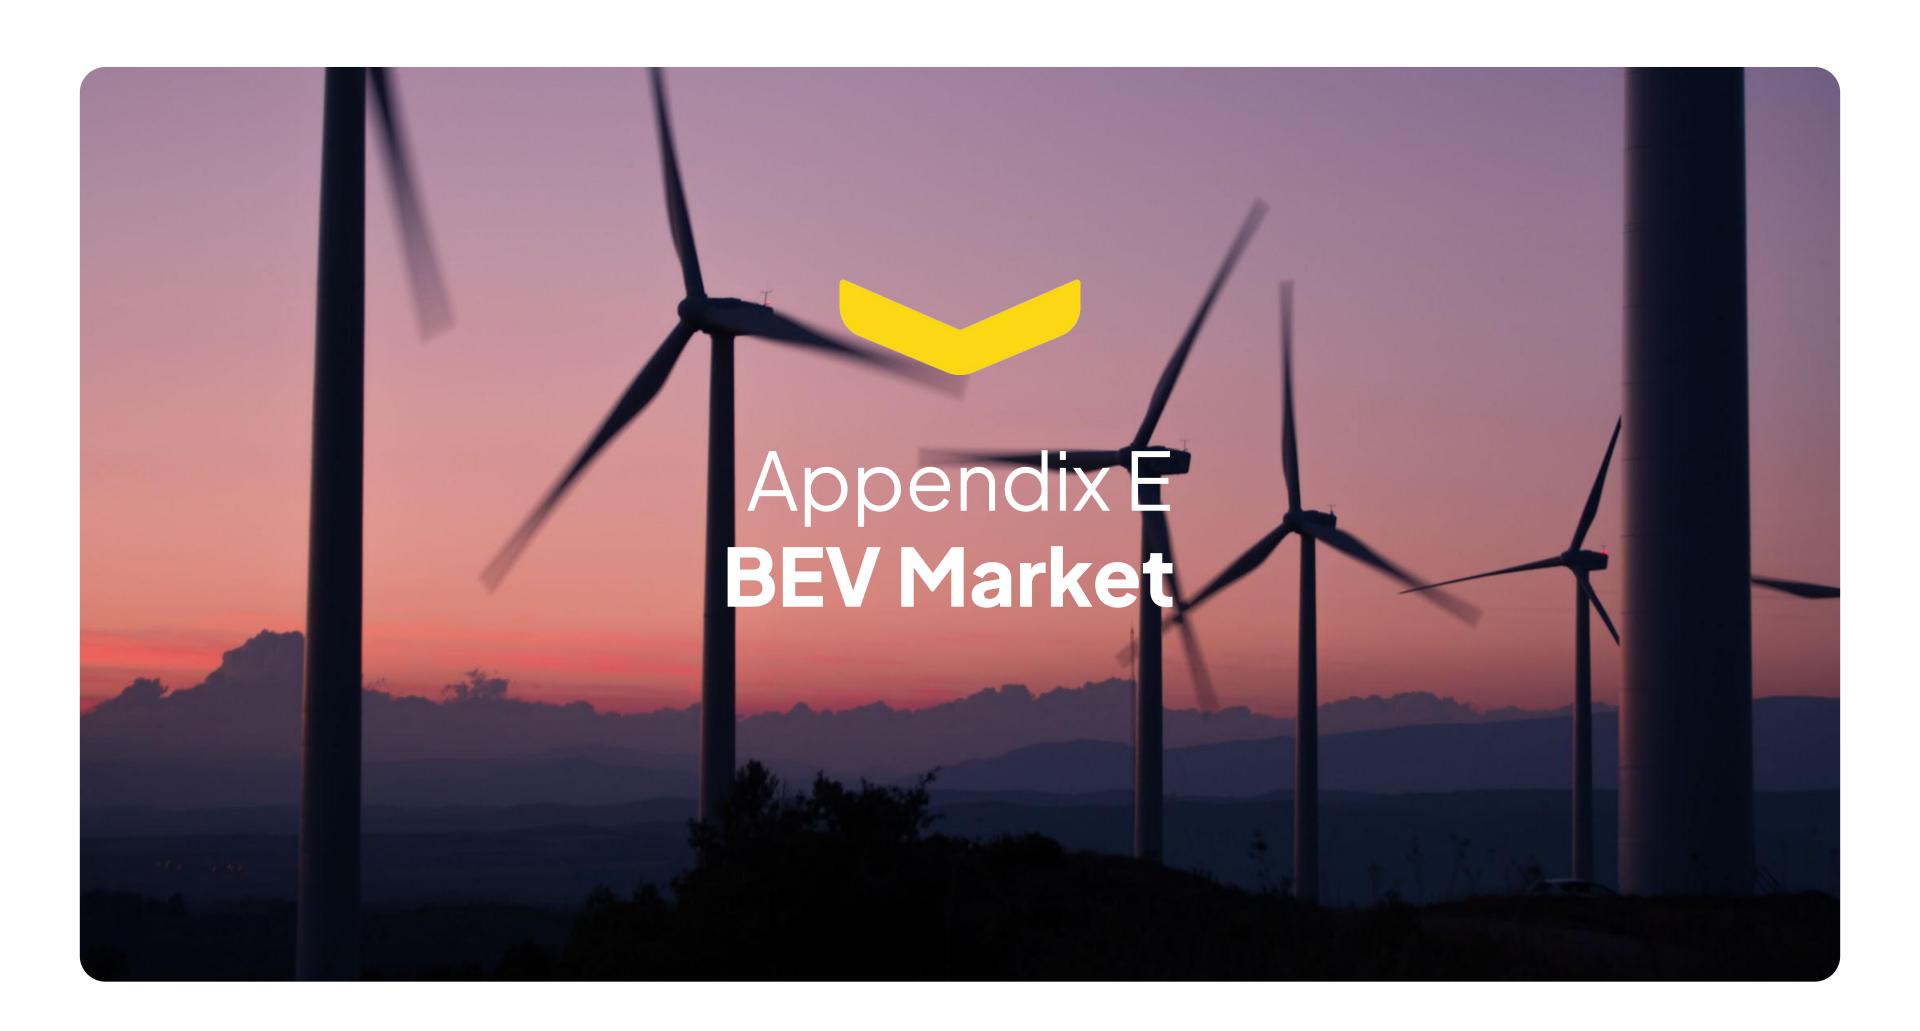

Dwell time behaviour is determined by the location of the charging station

- **Supermarkets** drivers will occupy a charger until they finish their shopping, regardless of SoC
- MSAs drivers will charge until they reach a sufficient SoC

Notes: 1) Source: Wood Mackenzie. 2) Source: Eurostat, How much time do we spend shopping? Min value of Germany, Netherlands, Belgium and United Kingdom. 3) Assuming revenue of €0.50/kWh.

2030 business case comparison	MSAs	Supermarket
Daily traffic	30,000	1,000
BEV penetration	~20%	~20%
Daily BEV traffic	6,000	200
Capture rate	2.5%	20%
Sessions / station / day	150	40
State of Charge	25%	50%
Battery size	69 kWh ¹	69kWh ¹
Maximum session size	52 kWh	35kWh
Dwell time	15 min	30 min ²
Maximum session charge speed	207 kW	69 kW
Utilisation rate	25%	25%
Max. annual per charger throughput	453 MWh	151 MWh
Max. annual per charger revenue	€227k	€76k
Max. annual per station revenue	€1,417k	€252k

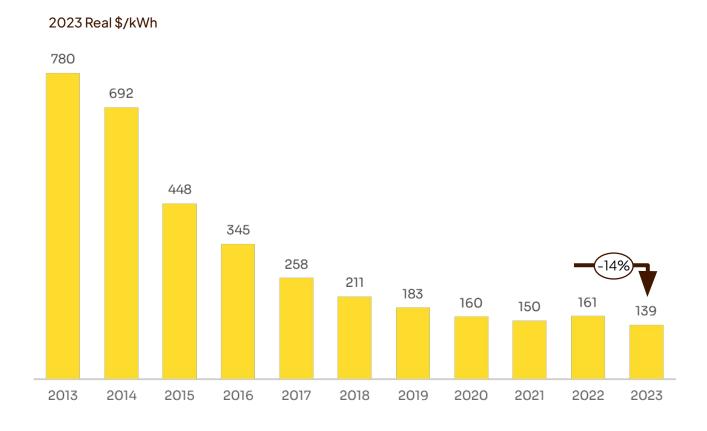

Long term BEV growth drivers in place

- Government incentives due to CO2 reduction targets
- Increasing supply of BEVs
- Battery technology advancements
- Growing consumer preference
- Increasing charging speeds & better infrastructure

Battery prices are continuing to fall following transitory price increase in 2022¹...

... with continued price reduction expected in 2024

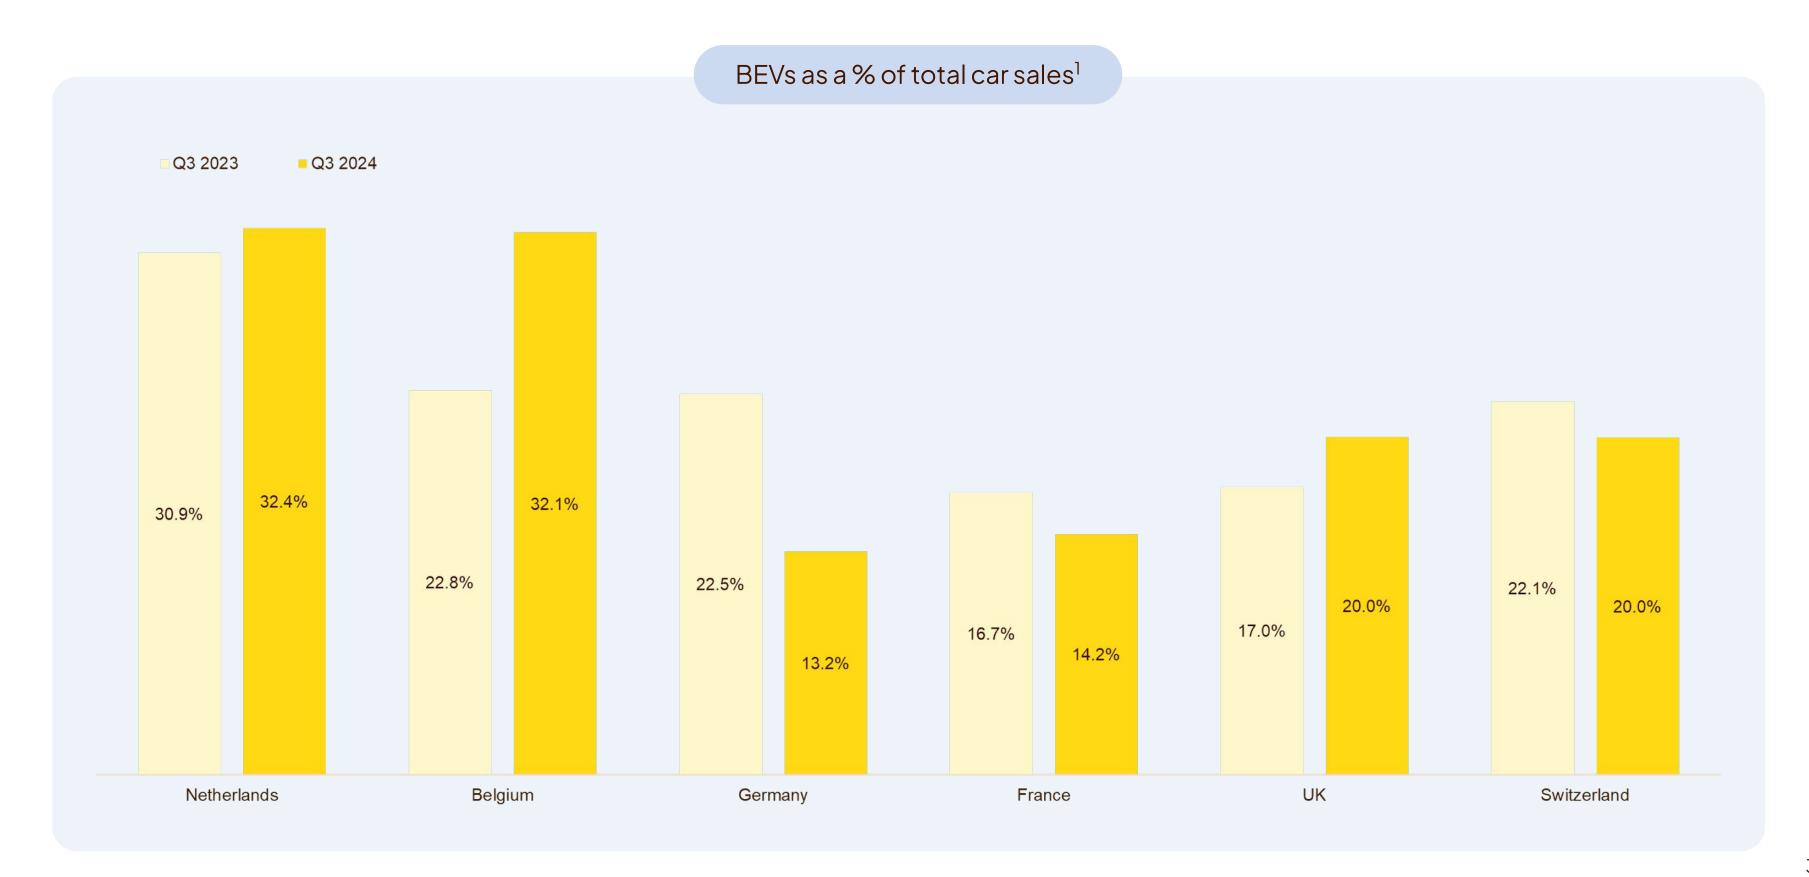

CATL, BYD To Slash Battery Prices By 50% In 2024. BOOM! EVs Win!

Source: BNEF

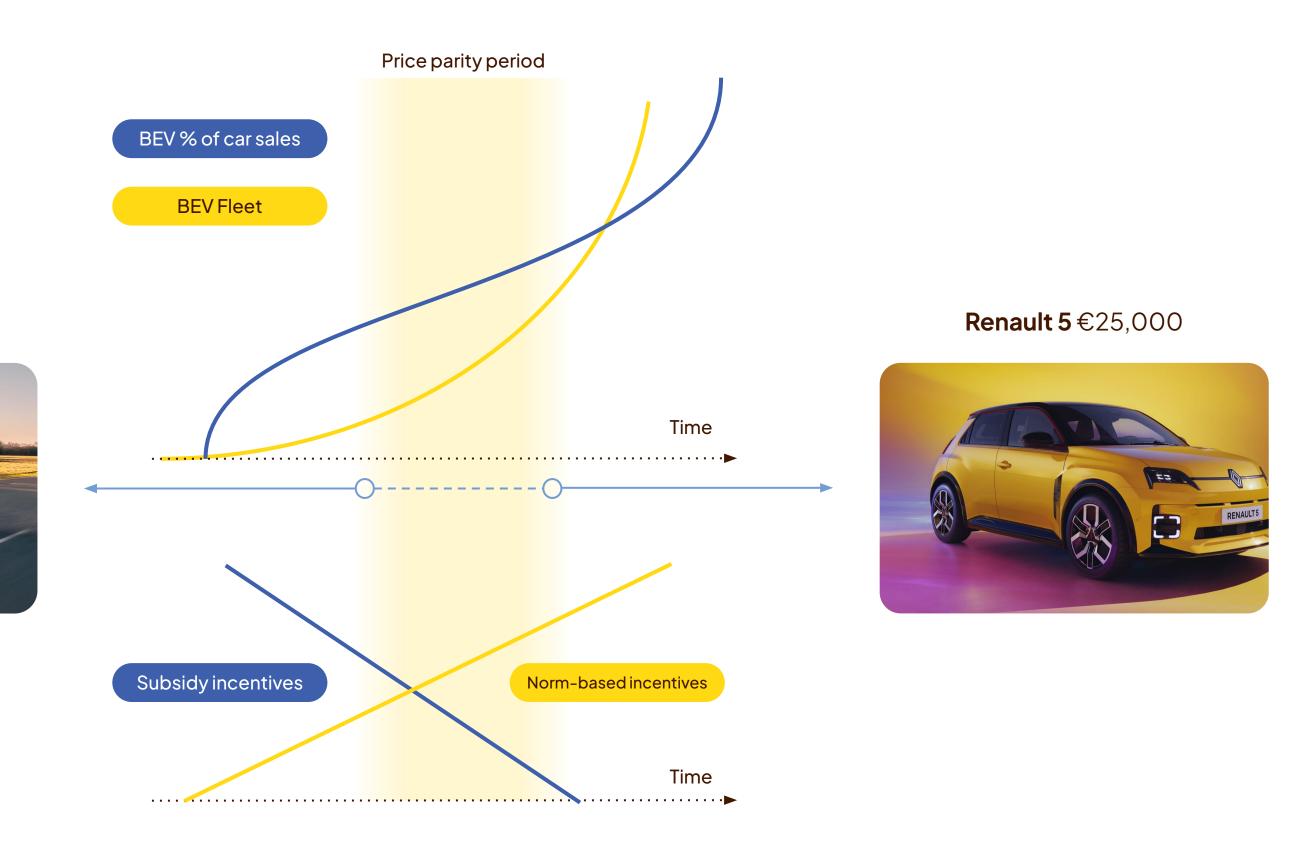

BEV sales in Fastned's key markets

Tesla Model Y €45,000

The twilight zone - in the price parity period

Improving ESG performance through fulfillment of roadmap milestones

- Adopted UN SDGs in 2022, included in <u>annual report</u>
- Completed first materiality assessment incorporating "double materiality" concept in Q4 2022
- Working towards integrated reporting, as per CSRD requirements
- Implemented sustainability reporting platform for GRI Standards
- Expect to share a more comprehensive ESG dataset in Fastned's 2023 Annual Report

Regulatory compliance, footprint analysis and making a positive impact are the main pillars of our sustainability focus

Compliance and reporting

- Preparing for CSRD (estimated to be in scope in 2025)
- EU Taxonomy eligibility and alignment
- Follow GRI standards for sustainability reporting
- Selected and implemented a sustainability reporting platform

Understanding our footprint

- Calculated CO2 footprint data for all Fastned stations based on the life cycle analysis of a standard station in NL
- Calculated and published scope 1, 2 and 3 emissions
- Achieved Level 4 of CO2 Performance Ladder certification
- 2030 CO2 emissions / kWh reduction targets of 80% for scope 1 & 2, 50% for scope 3¹

Making a positive impact

- Engage in community outreach initiatives
- Piloted a low-carbon construction project
- Advocate against the use of fossil fuels in the public domain (e.g. signed letter to stop fossil fuel subsidies)

Notes: 1) 2022 as base year

We are getting ready for all the electric trucks on the roads

More and more trucks are coming to the roads

More and more trucks are coming to the roads
